Upgrade your files (existing users only)

Company files created with a previous version of your AccountEdge or AccountEdge Pro software need to be upgraded. You also need to upgrade all customized reports, forms, letters, and spreadsheets that you used with your previous version of the software.

It is best to optimize and verify your company file first, then if there are no errors found you can make a back up copy of your company file before you upgrade it. Once you upgrade your company file, you can open it only in AccountEdge Pro or AccountEdge Network Edition, depending which software you use. However, the backup file can still be opened in your previous software version.

Upgrade AccountEdge company files

Do the following for each company file:

Task	Action
1	Upgrade your company files
2	Upgrade your customized templates

NOTE: Upgrading from AccountEdge Pro (Mac) to AccountEdge Network Edition (Mac) If you are upgrading from AccountEdge Pro to AccountEdge Network Edition on the Mac, you do not need to upgrade your files.

Task 1: Upgrade your company files

If you are using AccountEdge Network Edition, and users access company files from a shared location, you need to upgrade your company files on the host computer.

NOTE: Before you upgrade We recommend you optimize, verify and backup your company file before you begin the upgrade process. For more details, see the *Backing up and restoring company files* and *Servicing your company file* sections of the *Online Help*.

- 1 In the **Welcome to AccountEdge Pro** window, click **Company File Maintenance** and select **Upgrade Company File** from the menu. A welcome window appears.
- 2 Click **Next**. The **Select File to Upgrade** window appears.
- 3 Click **Find File**. The **Open** window appears.
- 4 Select the company file you want to upgrade and click **Open**. The **Select File to Upgrade** window reappears.

The current path and file name of the selected company file appears below the **Find File** button. The default path and name for the upgraded company file appear below the **Save As** button.

- 5 If you want to change the location or name of the company file:
 - a Click **Save As**. The **Save As** window appears.
 - b Specify a new location or type a new name and click **Save**.

NOTE: Save As location for AccountEdge Network Edition (Mac) users The upgraded file must be saved to Library>Application Support>AccountEdge NE>Databases folder found on the computer serving as the Host computer.

- 6 Click **Next**. The **Confirm** window appears.
- 7 Click **Next** to start the upgrade. When the upgrade is finished, the **Complete** window appears.
- 8 If you want to upgrade another company file, click **Next** and repeat from [step 2 above](#).
- 9 Click **Finish** to close the Upgrade Assistant.

If you customized any reports, forms or letters in your previous version of AccountEdge, proceed to [Upgrade your customized templates](#).

Task 2: Upgrade your customized templates

NOTE: Before upgrading your customized templates It is necessary to upgrade your company file before you upgrade your customized templates.

If you use customized reports, forms, letters, graphics, or spreadsheets, you need to upgrade these templates to use with the AccountEdge Pro version.

You can automatically upgrade your custom templates using a migration assistant (see [below](#)), or upgrade them manually by copying the templates to the application support folder (see [To manually upgrade your customized templates](#)).

To automatically upgrade your customized templates

- 1 In the **Welcome to AccountEdge Pro** window, click **Company File Maintenance** and select **Migrate previous version** from the menu. The **Migration Assistant** window appears.
- 2 The path to the previous application is displayed.

NOTE: If 'Please select your previous AccountEdge application' is displayed If your software was not able to locate a previous version, **Please select your previous AccountEdge application** will appear in the previous application field. Click **Browse** and select the location. Select the application file (for example, AccountEdge) and then click **Open**. The correct path should now be displayed in the **Previous Application** field.

- 3 Select **Copy Spreadsheets** if you have customized spreadsheets in your previous version.
- 4 Click **Start**. The upgrade process begins.
When the process is complete, the **Finished** window appears.

NOTE: Network users If you are using the software in a network environment, repeat the above steps for upgrading your custom templates on each computer.

To manually upgrade your customized templates

- 1 Find the **AccountEdge Pro 2017 US** support folder located in your **Documents** folder and open it.

NOTE: Pre-2012 users The customized forms folders can be found in the installation folder, (for example **AccountEdge 2011**).

- 2 Open a folder containing the customized templates.

Folder	File extension (Win)	Description
Custom Reports	*.rpt	User-customized report templates
Custom Forms	*.frm	Standard and user-customized form templates
Letters	*.dot	Standard and user-customized Microsoft Word document templates
Spreadsheet	*.xlt	Standard and user-customized Microsoft Excel spreadsheets
Graphics	*.bmp, *.gif, *.jpg, *.tif, *.png	Any graphics such as company logo, employee or item photos, etc.

- 3 Select only your custom template files and copy them.

NOTE: Avoid overwriting standard templates The standard templates included with the latest version of your software have improved features. To avoid overwriting the new templates with old versions, select only the template files that you created.

- 4 Paste the template files in each corresponding folder (for example, Forms) in the **AccountEdge Pro 2018 US** support folder.
- 5 Repeat from [step 2 above](#) for each folder containing customized templates.

NOTE: Network users If you are using the software in a network environment, repeat the above steps for upgrading your custom templates on each computer.

Set up a company file (new users)

When you create a company file, you record basic information about your business, such as the business name and contact details. You must also specify the month and fiscal year of the earliest transactions you want to record.

Depending on the features you want to use, there are some additional tasks that you may need to do.

Essential tasks The tasks you need to do depend on whether your accountant has created and set up a company file for you, the information you currently have, and when your business started.

Advanced tasks When you have completed the essential tasks, you can start recording transactions. However, if you need to use the advanced features of this software, (such as the payroll features) you will need to do further setup tasks. These tasks are covered in the Online Help files..

Task	
1	Create a company file
2	Easy setup assistant
3	Set up preferences
4	Set a password for the Administrator user ID

Task

5 [Set up accounts](#)

6 [Enter the account opening balances](#)

Task 1: Create a company file

When you make entries in your software, the information is stored in a file called a company file.

NOTE: Do you already have a company file? If your accountant has provided you with a company file, or if you want to use a file created with a trial version of this software, you don't need to create a company file.

Before you start, you need to know:

Your current fiscal year	This is the fiscal year for which you want to start recording transactions in your company file. Note that a fiscal year is represented by the calendar year in which the fiscal year ends. For example, if your fiscal year ends in December 2017, your fiscal year is 2017.
The last month of your fiscal year	This is the month in which your fiscal year ends. For most businesses the last month is December.
Your conversion month	This is the earliest month for which you want to record transactions. For example, if you want to enter transactions dated September 1 or later, your conversion month is September. You cannot enter transactions dated before the conversion month.
The number of accounting periods in your fiscal year	You can choose to have 12 or 13 accounting periods. A 13th period is a period for recording entries which you do not want included in the accounting figures for a particular month. For example, you can use it to record year-end adjustments that are attributed to all months. If in doubt, choose 13 periods.

The default list of accounts	<p>Accounts are categories to which you allocate each of your transactions. When you create a company file, you need to specify a default list of accounts. You can:</p> <ul style="list-style-type: none">• start with an accounts list provided by AccountEdge Pro. You can select a predefined accounts list suitable for your business.• import a list of accounts. You can import an accounts list from another company file, or one that has been provided by your accountant or Certified Consultant.• build your own list. You can start with an accounts list that has the minimum accounts required by your software and then add to it. <p>Note that you can modify your accounts list after creating your company file.</p>
------------------------------	--

NOTE: Some company file information cannot be changed Take care when creating your company file as some information—such as your current fiscal year, last month in fiscal year, conversion month, and accounting periods—cannot be changed once you have created your company file.

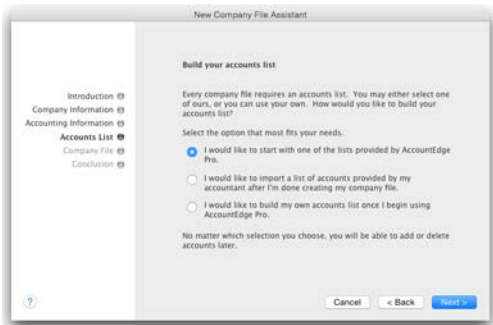

To create a new company file

- 1 Start your software. A welcome window appears.
- 2 Click **Create new company file**. The introduction page of the **New Company File Assistant** appears.
- 3 Read the information in this page and then click **Next**. The **Company Information** page appears.
- 4 Enter your business contact and registration details.
- 5 Click **Next**. The **Accounting Information** page appears.
- 6 Enter your fiscal year details and conversion month.

TIP: Current fiscal year This is the fiscal year for which you want to start recording transactions in your company file. It does not need to be the fiscal year that your business is currently operating in.

- 7 Click **Next**. A confirmation page appears.

- 8 Check the fiscal year and conversion month and then click **Next**. The **Accounts List** page appears.
- 9 Select the default accounts list you want to start with.

 - c If necessary, type a new file name in the **Save As** field.
 - d Click **Save**. The **Company File** page reappears.

NOTE: [AccountEdge Pro Windows only] Restricted access to the Program Files folder in Windows User Account Control (UAC) is a security feature in Windows. If UAC is active, files saved in the **Program Files** folder can only be opened by the Windows user who saved the files. If other users need to access your company file, do not save it in this folder. For more information about User Account Control, see Windows help.

- 14 Click **Next**. Your company file is created and the **Conclusion** page appears.
- 15 Click **Close** to display the **Easy Setup Assistant** window to continue to customize your company file setup.

Task 2: Easy setup assistant

You can setup your preferences by using the **Easy Setup Assistant**. This assistant guides you through setting up some key preferences.

To begin using the Easy Setup Assistant, click **Customize**. After you have finished each section beginning with **Customize**, **Accounts**, **Sales**, **Purchases** and **Payroll** click **Close**.

If you have completed each section, you can select '**Do not show me the Easy Setup Assistant when I open my file**'.

Task 3: Set up preferences

Preferences are settings that enable you to tailor your software to your business requirements.

NOTE: Do you need to complete this task? While you can complete this task later, you should review the default preferences that have been set before you start entering transactions.

You can set preferences to customize the way your software operates. For example, you can choose to automatically print invoices after recording them, or prevent transactions from being edited.

You can set up your preferences using the:

- **Customize Easy Setup Assistant.** This assistant guides you through setting up some key preferences. To access the assistant, go to the **Setup** menu, choose **Easy Setup Assistant**, and then click **Customize**.
- **Preferences** window. This window lists all of the preferences. To view this window, go to the **Setup** menu and choose **Preferences**.

Some preferences you should consider choosing include:

- **Use Audit Trail Tracking** If you want to keep a record of transactional, tax, account, payroll, and system changes, select this option. For more information about audit trail tracking, see your *AccountEdge Help*.
- **Transactions CAN'T be Changed; They Must be Reversed** If you want to prevent transactions from being edited or deleted, select this option. When you do want to change or delete a transaction, you will need to record a reversal transaction. For more information, see the *AccountEdge Help*.
- **I Deal in Multiple Currencies** If you want to enable multi-currency accounting, select this option. For more information about working with multiple currencies, see your *AccountEdge Help*.

Task 4: Set a password for the Administrator user ID

A user ID is the means for:

- controlling access to a company file
- tracking a transaction record history
- saving individual preferences

When you created your company file, a user ID called Administrator was automatically created.

By default, the Administrator user ID does not have a password assigned to it. Anyone who signs on with the Administrator user ID will have complete access to all command centers, functions, and windows and will be able to create, edit, and delete other user IDs. For this reason, as soon as you create a company file, you should assign a password to the Administrator user ID; otherwise, anyone can sign on and then enter, edit, and delete transactions in your file.

To set a password for the Administrator user ID

- 1 Start your software. The **Welcome** window appears.
- 2 Click **Open**. The **Sign-on** window appears.
- 3 Click **Change Password**. The **Change Password** window appears.
- 4 In the **Change Password** window, enter the password in both the **New Password** and **Confirm Password** fields.
- 5 Click **Record**.

NOTE: User access restrictions If you want to restrict other users from accessing certain features or information, you can create additional user IDs and specify their access restrictions. For more information, see the 'Managing user accounts and company files' chapter in the *AccountEdge Help*.

Task 5: Set up accounts

Accounts provide a means for grouping similar transactions. For example, if your business pays rent for the use of its premises, you

would create a rent account and then allocate all rent payments to that account.

The accounts you use for your business are grouped in an accounts list.

NOTE: Do you need to complete this task? If your accountant or Certified Consultant has provided you with a company file, this task may have been completed for you. In this case, go to [Enter the account opening balances](#).

When you created your company file, you selected a default accounts list to start with. This list may already have the accounts you need. If not, you can change the list to suit your needs. If you are unsure, ask your accountant which accounts you should create, edit or delete.

If you chose to import a list of accounts, you should import this list now. For information about importing data into your company file, click the Help button in this window.

Account numbers Each account is identified by a unique five digit number. The first digit indicates the account's classification (for example, accounts starting with 1 are asset accounts). The remaining four digits determine its location within the classification. The lower the number, the higher up in the list it appears. For example, account 1-1100 appears above 1-1200.

Account classifications and types The accounts list groups accounts into eight classifications—Assets, Liabilities, Equity, Income, Cost of Sales, Expenses, Other Income, and Other Expenses. Within each account classification there is at least one account type.

Account classifications and types are described in the following table.

Classification	Type	Description
Asset (1-xxxx)	Bank	Money in the bank, for example, in a checking or savings account.
	Accounts Receivable	Money owed to you by your customers.

Classification	Type	Description
	Other Current Asset	Assets that, if required, can be turned into cash within a year. These may include your term deposits.
	Fixed Asset	Assets which have a long life, for example, buildings, cars, or computers. Fixed assets are usually depreciated.
	Other Asset	Other assets you own, such as loans made to others and goodwill.
Liability (2-xxxx)	Credit Card	Repayments to service credit card debt.
	Accounts Payable	Money owed by you to your vendors.
	Other Current Liability	Money owed by you that is due in less than a year, for example, tax.
	Long Term Liability	Money owed by you that is due in more than one year, such as a business loan.
	Other Liability	Other money you owe.
Equity (3-xxxx)	Equity	The business's net worth, that is, its assets minus its liabilities. Common equity accounts are current year earnings, retained earnings, and shareholders' equity.
Income (4-xxxx)	Income	Revenue from the sale of goods and services.
Cost of Sales (5-xxxx)	Cost of Sales	The direct cost of selling your goods and providing services, for example, purchase costs and freight charges.
Expense (6-xxxx)	Expense	The day-to-day expenses of running your business, for example, utility bills, employee wages, and cleaning.

Classification	Type	Description
Other Income (8-xxxx)	Other Income	Other revenue, for example, interest earned on savings and dividends paid from stocks.
Other Expense (9-xxxx)	Other Expense	Other expenses, for example, interest charged.

Header accounts Your accounts list consists of detail accounts (the accounts to which you allocate transactions) and header accounts. Header accounts group related detail accounts to help you organize your accounts list.

For example, you could group your telephone, electricity, and gas expense accounts using a Utilities header account. This makes it easier for you to locate the utility expense accounts in the accounts list and to see your combined utility expenses.

You group accounts by indenting the detail accounts located directly below a header account.

Account Name	Type	Linked	Balance
⊖ 1-0000 Assets	Asset		\$217,138.28
⊖ 1-1000 Current Assets	Asset		\$40,419.60
⊖ 1-1100 Cash On Hand	Asset		\$0.00
⊖ 1-1110 Checking Account	Bank	✓	\$17,344.05
⊖ 1-1120 Payroll Checking Account	Bank	✓	(\$15,943.18)
⊖ 1-1130 Fleet Bank Card	Bank		(\$5,047.45)
⊖ 1-1140 Petty Cash	Bank		\$159.01
⊖ 1-1150 Electronic Payments	Bank	✓	\$600.00
⊖ 1-1160 Undeposited Funds	Bank	✓	\$20,794.71

⊖ 1-1500 Prepaid Interest	Other Asset		\$0.00
⊖ 1-1600 Prepaid Taxes	Other Asset		\$0.00

Note that:

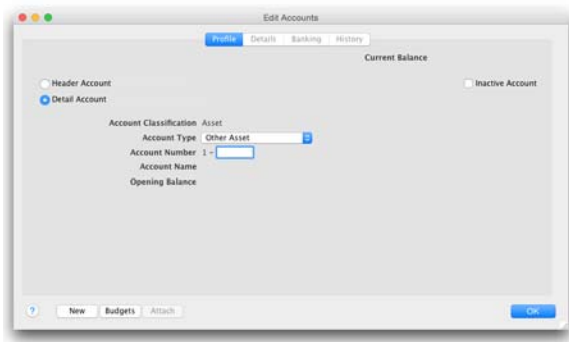

- You cannot allocate transactions to a header account.
- The balance of a header account is the sum of the detail accounts indented directly below it.
- You can create up to three header account levels.

 - b Type the budget amounts in the monthly columns.
 - c Click **Close**.For more information about budgets, see your *AccountEdge Help*.
- 13 Click **OK** when you have finished. The account you created now appears in your accounts list.

To group detail accounts with a header account

You group accounts by indenting the accounts located below a header account. You do this by clicking the **Up** button or the **Down** button located at the bottom of the **Accounts List** window.

- 1 Go to the **Accounts** command center and click **Accounts List**. The **Accounts List** window appears.
- 2 Select the detail account you want to group.
- 3 If you want to group the account with the header account located immediately above it, click **Down**.
- 4 If you want to group the account with a header account above the current header account, click **Up**.

Task 6: Enter the account opening balances

Account opening balances are the balances of your accounts as of the first day of your conversion month.

NOTE: Do you need to complete this task? If you were in business prior to your conversion month, most of your accounts probably already have balances. If you want to produce financial reports that included these balances (such as a balance sheet), or you want to track the balance of accounts with a cumulative balance (such as your bank account), you need to enter these balances.

You can find your account opening balances on a trial balance report, a balance sheet or a profit & loss report prepared for the period immediately prior to your conversion date. You can ask your accountant to prepare these reports. You may also be able to find your account opening balances using your previous software or paper-based records.

The balances you enter in your accounting software depend on whether your conversion month is also the first month of your fiscal year.

If your conversion month:

- **is the first month of your fiscal year**, enter the opening balances of your asset, liability, and equity accounts only. The opening balances of your income, cost of sales, and expense accounts should be zero.
- **is not the first month of your fiscal year** (for example, if your fiscal year starts in April but your conversion month is August), enter the opening balances of *all* your accounts.

Opening bank account balances You can enter either of the following amounts as the opening balance of a bank account:

- the bank account balance that appears on your balance sheet or trial balance reports as of the day prior to your conversion date. For example, if your conversion date is January 1, 2018, this is the bank account balance as of December 31, 2017.

These reports can be provided by your accountant, or you can obtain the balances using your previous software or paper-based records.

- the checkbook balance of the account as of the end of the day prior to your conversion date. You can calculate your checkbook balance by taking into account the transactions not yet cleared by your bank as of the conversion date and the balance that appears on your bank statement at that date.

For example, assume that \$500 worth of deposits and \$1000 worth of payments did not appear on your bank statement at

your conversion date. The checkbook balance would be calculated as shown below:

Bank statement balance as of the conversion date	\$21,000.00
ADD uncleared deposits	+ \$500.00
SUBTRACT uncleared payments	- \$1,000.00
Checkbook balance as at the conversion date	\$20,500.00

To enter opening balances

- 1 Go to the **Setup** menu, choose **Balances** and then **Account Opening Balances**. The **Account Opening Balances** window appears.
- 2 Enter the balances in the **Opening Balance** column.

NOTE: Enter opening balances as positive numbers For example, don't enter liability account balances as negative numbers. Enter negative amounts only if accounts truly have negative balances.

- 3 Check that the amount in the **Amount left to be allocated** field at the bottom of the window shows **\$0.00**.

If this field displays an amount other than **\$0.00**, check your opening balances again because they are either incomplete or

incorrect. However, you can continue the setup process if there is an amount in the **Amount left to be allocated** field. The amount will be assigned to a special equity account called Historical Balancing.

- 4 Click **OK**.

Check for software updates

To make sure you are using the current version of your accounting software, you should check every so often to see if any updates or upgrades are available.

To check for updates using a Mac computer, open your company file, then go to the **AccountEdge Pro** menu and click **Check for Updates**.

To check for updates using a Windows computer, open your company file, then go to the **Help** menu and click **Check for Updates**.
